About This Content

Did You Enjoy The Music?

If you enjoyed the soundtrack as much as the game, you know can purchase it to listen to whenever you like!

The Just Ignore Them Soundtrack was originally composed and created by me. I tried my best to really capture the moment in the scenes and to emphasize emotion in the music (As best as I could).

How to install/access the Soundtrack

There's no installation process. Once purchased and downloaded, the soundtrack will show up in the games directory. The Soundtrack takes a little digging through the game's Steam Directory, which could be located in C:\Program Files (x86)\Steam\steamapps\common\Just Ignore Them

P.S This may not be the case for everyone, others directories may be different but it's in the [\Steam\steamapps\common\Just Ignore Them] folder
